ABOUT US ABOUT US ABOUT US

We believe in giving more value to our dealers than anyone else. We have been doing this for more than 19 years and we possess the formula on how to be successful. We will train and provide information to our dealers to increase sales and make more money while being green and positively affecting the environment.

AT DAYMAK OUR GOAL IS TO MAKE OUTSTANDING CLEAN VEHICLES THAT MAKE A POSITIVE IMPACT ON THE ENVIRONMENT FOR TODAY AND FUTURE GENERATIONS. WE BUILD OUR VEHICLES TO GIVE FREEDOM OF MOVEMENT THAT ARE ALSO A JOY TO RIDE.

Every time an ebike is sold less CO₂ is being released into the air. An e-bike's carbon footprint is just 2.6 grams of CO₂ per mile, compared to 150 grams for most electric cars and 136 grams for scooters and 353 grams per mile for an average car. The biggest environmental contribution that the e-bike makes is as a replacement for your car. Of the millions of car journeys people take, 50% are under 3 miles (5 kilometers). So if we could eradicate people using their cars for short journeys, then we'd have fewer emissions, less congestion, and fewer cars on the road. This industry is expected to grow to \$210 billion dollars by 2021. By selling Daymak products you will join one of fastest growth industries and will make money! Go Green!

"More and more people are going green. We are all part of the solution going forward. We are making a difference. Thank you for representing Daymak and making a difference!"
